INTRODUCTION

The Faculty of Business, Economics and Accountancy (FBEA) was established in 1995 under the name of School of Business and Economics. The aspiration of its establishment was the needs for professionals in the area of management, business and economics. Realizing the importance of human capital as a basis to create a developed nation, as outlined in Vision 2020, the academic program in FPEP is formulated to produce quality graduates to fulfill the needs for capable managers, entrepreneurs, accountants, economists and industrial players. Apart from fulfilling the needs of the nation and optimizing the existing competitive advantage, the graduates of FPEP is prepared to compete in the global market with international standard, technical ability and soft skill. In line with the economic and business development, the dynamic academic programmes in FBEA have progressively developed to become ten undergraduate programmes that encapsulate the discipline of business, economics and accountancy. After 20 years of its establishment, FBEA has successfully produced more than 10,000 graduates (undergraduate and postgraduate) who came from various countries and now becoming important assets to various sectors and industries internationally. Beside a continuous quality assurance and benchmark internationally, research activities and community engagement are also empowered via global networking with various institution and organizations. With the visionary education philosophy, that crystallised in the form of a long range plan called Malaysian Education Development Plan (PPPM, 2015-2015), FBEA is progressing with academic, scholarly and research activities based on the University niche area, in particular entrepreneurship and hospitality industry.

VISION

The Faculty of Business, Economics and Accountancy (FBEA) strives to be an innovative world-class faculty, in line with the Universiti Malaysia Sabah (UMS) vision.

MISSION

The Faculty of Business, Economics and Accountancy (FBEA) strives to achieve excellence in the dissemination of knowledge in the fields of business, economics and accountancy towards the attainment of international recognition, for its teaching and learning, research, publication, community engagements and the balanced specialization of knowledge. The strive for excellence is vested through the personality development of students complimented with soft skills as well as entrepreneurial skills in support to the society and the Nation’s aspiration towards attaining high productivity and quality.

BT12003 MARKETING

This course deals with the study and analysis of the basic principles, theories, problems, and practices of marketing in our modern ever changing economic environment. Emphasis is placed on the marketing functions, planning and the distribution of goods and services from the producer to the ultimate consumer. The marketing mix (product, price, place, and promotion) is presented as a controllable variable to target market segments, which have unmet needs and wants that a firm can satisfy and be profitable. Market research and information technology tools of the marketing manager are explored.

References

BT11703 MACROECONOMICS

This course aims to give understanding to the students about theories and concepts in macroeconomics. Among the titles discussed are consumption and investment, aggregate demand and supply, changes in macroeconomics output, unemployment, inflation and interest rates, macroeconomics policy and stabilization and foreign exchanges rate.

References

BT11803 MATHEMATICAL ECONOMICS

Students of economics need several important mathematical tools. Economics is a technical discipline which can be described quantitatively at different levels. Thus there is a need to provide sufficient mathematical training and knowledge consistent with the ability to deal with the mathematical descriptions of a wide range of theoretical concepts contained in economics. This module increases the students' knowledge base and provides more insight into the role of mathematics in economics. The aim of the module is to provide students with the mathematical tools required for economic analysis at undergraduate level. Emphasis will be placed in developing ability in translating economic problems that students will encounter into mathematical models, and on solving these models. Furthermore, the module aims to prepare students for further study, or for professional and managerial careers, particularly in areas requiring the application of quantitative skills.

BT22303 HUMAN RESOURCE MANAGEMENT

Physical and capital assets in organizations are considered to be valued items. Regardless the size and nature of organization, effective and efficient management on its human resources is essential. To date, organizations are becomingly aware that the key to competitive advantage does not only lie on its ingenious product design or service, their technology advancement, the best marketing strategy or the most know-how financial management but from having an appropriate system of managing its human capital. The aspect of translating the company's objectives into specific human capital objectives is inevitable as managers are expected to advise top management on the company's human capital direction and development. Human resource management (HRM) is a central function of organizations, effective use of the resource through management of people, including leadership, resources planning, recruiting and selecting talented employees, training and compensating effectively, and controlling the performance. HRM is the management of people and work to achieve organizational goals. Knowing of people is the heart of any organization, having the ability to manage and develop employees is essential to business sustainability. The course aims to produce well-rounded business managers with exemplary knowledge, relevant hands-on experience and being contextually performing the HR jobs. The course is designed to develop an appreciation of the foundations of HRM, obtaining the knowledge and skills to play an integral role in carrying HR policies and practices in their organization. Comprehending HRM is essential whether the learners work in government agency, business organizations, non-profit and non-governmental organizations (NGOs), and any other type of organization. Key objective of the course is to exhibit HRM is more than just employment and keeping records, whereby it is the strategic organizational activity of increasing complexity and importance. To master the course, learners would need to know the elements of HR functions (recruitment, selection, training and development) and familiarized with the HR key concepts and terminology. The outcome of the course enables the learners to apply the principles and techniques of HRM gained through the course to discussion of major issues and solutions of typical case problems. The course is divided into six parts: Part 1: Introduction to HRM, Part 2: Staffing, Part 3: Training and Development, Part 4: Compensation, Part 5: Employee Relations, and Part 6: Special Issues in HRM.

BC30803 ISLAMIC FINANCIAL ECONOMICS

The course provides an overview of Islamic economics, Islamic banking and Islamic finance industry. The course examines Islamic economics, Islamic banking and Islamic finance industry components, including Islamic banking in theory and practice, the evolution of modern Islamic finance and financial product and instruments. This course focuses on processes of Islamic banking and Islamic finance development within the context of local and global issues, emphasizing the importance of Islamic banking and Islamic finance, financial products and instruments and overall processes of transformation and development in Islamic banking and finance. Key issues to be addressed include the nature of Islamic banking and finance, level and nature of inter-relationships between Islamic banking, financial products and instruments and impacts on Islamic banking, processes of Islamic financial products transformation in Malaysia and other countries, and the role of institutions and policies in processes of financial product development. The course emphasizes that there are a number of perspectives on the role of Islamic banking and finance within international development and that differing paradigms dominate at particular points in time. The analytic approach and many of the issues discussed are drawn from regulatory issues and challenges, although an attempt is made to position these within the broader social, religions and political context.

References
Environmental economics is a dynamic field. This subject has become an important focus of debate around the world, with experts as well as ordinary citizens concluding that the environment and the economy can no longer be viewed as separate entities. As a result, contemporary environmental issues are increasingly seen from the point of view of their economics effects and their consequences for human well-being now and in the future. Environmental issues have been integrated into private and public decision making. National and international policies have been developed to preserve natural resources and ecosystems. Firms have redefined their business strategies in response to new regulations and the changing demands of more environmentally conscious consumers. In other words, there has been a major shift of focus on the part of development specialists towards the many problems of the environment and development. Growth and environmental quality can be both complements and substitutes. As a society, we have come to recognize that economic activity and the natural environment are inexorably linked, and this relationship is the core of environmental economics.

References

Industrial economics is a field of economics that studies the strategic behavior of firms, the structure of markets, and their interactions. The study of Industrial Economics adds to the perfectly competitive model real-world frictions such as limited information, transaction cost, cost of adjusting prices, government actions, and barriers to entry by new firms into a market. Thus, the rational of inclusion of this course is to familiarize students with various disciplines in Industrial Economics context.

References

This course aims to expose students to the real business environment in the areas of economics, business and management (logistic, operation, marketing, finance, public relation, human resources management and management, and economics). Students will spend 3 months in organisations/firms of their choice and will be supervised by the organisations/firms management.
Apart of the immediate supervision, students will be visited by academic supervisor. Student ability in applying verbal and non-verbal skills will be assessed through their ability in report writing, preparation of log book and comments from immediate supervisor.

### BC30106 ACADEMIC EXERCISE

This course is important to provide a solid foundation on research technique and methods on issues of development economics. This course enable students to undertake research, collect data and information, analyze data using statistical and economics software and discuss the research findings by providing critical arguments apart from applying the economics theories learnt.
BD20303 ADVANCE FINANCIAL MANAGEMENT

The course is conducted with the assumption that participants have acquired principles knowledge of financial management. It aims to investigate the importance for an efficient financial management and how it is applicable in corporate decision making. To further enhance the level of understanding and the analytical skills in making financial decisions, case studies will be conducted extensively so that participants are aware of latest issues and development in the field of corporate finance. It also serves as a tool for the application of financial knowledge and theories as to better equip participants for life after college.

References

BD20203 MONEY AND CAPITAL MARKET

This course is considered one of the essential courses in business and finance program since it deals with the dynamic structure of the money and capital markets with special reference to the Malaysian context. Hence, the course will help students to understand the different but closely related functions of money and capital markets as well as various institutions within the markets. The course has become even more significant amid the various changes in the money and capital markets worldwide and the increasing correlation between the local and international markets. At the end of this course, students should have a comprehensive knowledge on the structure of the Malaysian money and capital markets, and have better understanding on the functions of various institutions within the market.

Rujukan

BD30703 RISK MANAGEMENT AND INSURANCE

Risk affects every aspect of an organisation, from boardroom to the boiler room. The effects of risk are not confined within any predictable boundaries; a single event can easily influence several areas of an organisation at once. The pervasiveness and complexity of risk presents strong challenges to managers, one of the most important being the coordination of risk management across within organisation. It is therefore a necessity for all executives and managers to equip them with knowledge in risk management planning. As insurance has been used extensively as a risk management tool, knowledge in insurance management would offer an alternative for executives and managers in mitigating loss. After completing the course, a student should be able compare and contrast sources of risks and identify suitable risk management plans for organizations. At the same instance, the
students are able to examine insurance contracts and to decide how insurance can be used to handle risks and also able to develop financial plans for family based on insurance products.

Rujukan

BD31303 FINANCIAL STATEMENT ANALYSIS

This course is introduced with an emphasis to incorporate the art and science elements in Financial Statement Analysis. It is the application of the analytical tools and techniques to general-purpose financial statements and related data to derive estimates and inferences useful in business analysis. Financial statement analysis reduces one’s reliance on hunches, guesses, and intuition for business decisions. Throughout the course, students will be trained to systemized facts, to apply businesses principles and methods in order to develop a sensible perception, creativity and ingenuity.

References

BD31503 THEORIES AND PRACTICES OF ISLAMIC BANKING

This course is designed to expose the students with the theory and practice of Islamic banking and finance. The theoretical part includes discussions on the Islamic Syariah (jurisprudence) law and muamalat (business and economics) especially the philosophies and principles of Islamic banking and finance, riba (interest) and the various financial contracts under the Islamic Syariah. The practical part examines the current practice of the Islamic banking and finance including the discussion on the Islamic financial markets, products and services (including the takaful) as well as the operation of Islamic banks.

References

BD31603 BANK MANAGEMENT

The banking industry affects the welfare of every other industry and the economy. Banks are the leaders of the financial-services industry as a whole; however, financial-service competitors are now challenging them more than ever before. This course is designed to help students establish management principles and to confront the perplexing issues of risk, regulation, technology, and competition that bankers and other financial-service managers see as their greatest challenges for the future.

References

BD31703 INTERNATIONAL BANKING

This course provides an overall understanding of the theory and practice of trade from domestic and global perspective. Students will be equipped with vital understanding of the theory and practice of foreign exchange. It will also provide a comprehensive training for students in identifying and understanding the operation and functional purpose of international finance, international trade and multi-national banking. This course will induce analytical and problem solving skills that are highly valued in the financial services industry as well as review case studies demonstrating actual situations and decision making.

References
BD31803 OPTIONS AND FINANCIAL FUTURES MARKET

This course is designed and to be conducted with the assumption that participants have possessed the fundamentals of derivatives instruments and the concept of hedging. For the benefits of those that have not, the course will run through the basic concepts very quickly. In addition to topics stipulated in the course outline, the course also covers relevant and current issues. As the line separating hedging and speculation is at times unclear, this course will cover large corporate failure resulting from derivative usages. It is one of the aims of the course for students to learn not just the benefits of derivatives, but how they could be harmful when mismanaged and/or misused.

References

BD32203 FINANCIAL BEHAVIOR

It is necessary to equip students with the understanding of psychological influence in decision making. This is because in the real life, psychology affects decision more than financial theory does. This course describes how individuals and firms make financial decisions, and how those decisions might deviate from those predicted by traditional financial or economic theory. Students explore the existence of psychological biases in financial decision-making, and examine the impacts of these biases in financial markets and other financial settings. The course examines how the insights of behavioural finance complement the traditional finance paradigm.

References

BD20403 INVESTMENT ANALYSIS

The significance of this course lies on its ability to provide students with essential knowledge on investment and equip them with basic skills in share trading. Such knowledge and skills are necessary so the students will be able to understand the dynamic nature of investment and enable them to formulate their investment strategy as well as decision making appropriately. Hence, the course will help in producing a group of well-informed potential investors and/or future fund managers with expertise in investment who are ready to enter the capital market, in particular.

Rujukan
BD30803 LAW OF BANKING AND FINANCIAL INSTITUTIONS

The course discusses the legal framework relating to banking and financial institutions in Malaysia as provided under the Financial Services Act 2013 (Act 758), Islamic Financial Services Act 2013 (Act 759), Central Bank of Malaysia Act 2009 (Act 701) and several other acts. The important topics covered include the structure of the Malaysian banking system, banker and customer’s relationship, rights and duties of bankers and customers, customer’s mandate, types of customer’s accounts, regulation and supervision of banks by the Central Bank of Malaysia, negotiable instruments, electronic banking and internet banking, Islamic banking in Malaysia, lending and securities, recovery of loan and insolvency, and the law relating to anti-money laundering and anti-terrorism financing.

BH31103 LABOUR AND PRODUCTIVITY

Productivity is viewed as vital in achieving success or failure. This course discusses and elaborates how well an organization is functioning. Growth of labour productivity can be found in the results it achieves through the use of its resources. If the ratio of output to resources is large, we say the results are good and the organization is functioning effectively. It is productive because the value of its output exceeds its investment in the resources used to achieve that output. Lectures on theory will be combined with the tutorial sessions. The focus will be labour productivity, a subtopic (specialization) of the field of labour economics. Discussions will emphasize two components. The first component is concerning basic knowledge of supply and demand of labour. The second is related to the determinant factors of productivity; measurement of labour productivity in different sectors (cross sections) and total factor productivity (cross countries).

References
BH31203 SELECTED TOPICS IN LABOUR ECONOMICS

BH33403 GENDER AND LABOUR MARKET

This course provides introductory materials for economics status of women as compared to men in labour market. The syllabus is devoted to applications and policy and less formal economic theory and specifically concerned with the economics status of women. Most chapters include case studies (from the United States of America) illustrating how the gender differs in labour market outcomes from an economics perspective. The chapters introduce students to the economist’s view of the labour force participation of women, gender wage gap, non-market work, trends in marriage, divorce and overall fertility, labour market discrimination and as well as various antidiscrimination legislations. The economic status and labour force participation of women in both the developed and developing countries will also be discussed.

BH33503 MANAGEMENT & ORGANIZATIONAL BEHAVIOUR

This course is designed to give students an overall appreciation of the importance of management and organizational behaviour. It provides students with a comprehensive understanding of management and organizational behaviour fundamentals in the business environment. The course content also to help students improve on their writing and oral skills.

References
BH33603 HUMAN RESOURCE INFORMATION SYSTEMS

This course features a structured learning system that reinforces the concepts through features such as chapter-opening organizers, section reviews, frequent applications, and hands-on exercise and activities. The course provides understanding of human resource systems technologies that are suitable to the students’ needs and requirement. Students will be able to explore the process of designing an HRIS, as well as explore the IS implementation in various HR functions.

References

BH33703 QUALITY MANAGEMENT

The total quality concept as an approach to doing business began to gain wide acceptance in the United States in the late 1980s and early 1990s. However, individual elements – statistical use of data, six sigma, lean, teamwork, continual improvement, customer satisfaction, and employee involvement have been used by visionary organizations for years.

**BH3006 PRACTICAL TRAINING**

This course requires students to undergo industrial training at selected government or private organizations. At the end of the training duration, students are required to prepare a comprehensive written report by applying the theories that they have learnt.

**BH30106 ACADEMIC EXERCISE**

This course requires students to conduct a research in the field of human resource economics. Research topics may include labour demand and supply, human capital, labour in Islam, industrial relations, labour and productivity, labour and industrial law, international human resource economics or other related topics. This course enables students to undertake research, collect data and information, analyze data using statistical and economics software and discuss the research findings by providing critical arguments apart from applying the economics theories learnt.
**TOURISM MANAGEMENT PROGRAMME (HP08)**

**BY20103 PRINCIPLES OF TOURISM**

Principles of Tourism are an introductory course which introduces the key concepts that tourism student will need to understand the complexity of tourism. Students will be able to identify the main sub sectors. Besides that, the focused is also on the operating characteristics, trends and issues that dominate tourism specifically upon attractions, accommodations, intermediaries, transportation, public sector and destination.

**References**

**BY20203 CULTURE IN TOURISM INDUSTRY**

Culture in Tourism Industry is an important course for level 2/3 undergraduates on tourism management programmes. Students learn a comprehensive exploration of the management, operations and marketing of cultural tourism attractions and resources in a global context. The covering of a wide range of local as well as international destinations and placing theory next to practical examples allows for students of all backgrounds to gain a better understanding of the role that cultural tourism plays in tourism development today.

**References**

**BY20303 TOURISM INTERMEDIARIES**

This course introduces students to the operation and management of tourism intermediaries. “Tourism Intermediaries” is designed to expose students to the changing environment of the tourism and travel markets, including technological, economic, environmental, social, and political trends. This course further exposes students to the various tourist destinations and its linkage to, the role of tourism intermediaries towards a destination and its attractions.

**References**

BY30403 TOURISM MARKETING

The course involves the study of marketing theory as it applies to the tourism industry. It focuses on the strategies adopted by public and private sector tourism practitioners to market tourism destinations and products. The course focuses particularly on the tools of communication strategy, the role of image and branding in tourism marketing, and the changes in tourism marketing that have evolved with developments in electronic technology. The role of key players in the tourism industry will be investigated from a marketing perspective, including destination marketing organizations, tour operators, hoteliers and airlines. The course also looks at how marketing strategies have become more tactical and responsive within the current climate of political and economic instability, using marketing to help the industry recover from crises such as terrorism, natural disasters and wars.

References

BY30503 TOURISM PLANNING AND DEVELOPMENT

This course will introduce the student to the basic concepts and practices associated with tourism planning. Although tourism continues to be an important element for socio cultural, environmental, political and economic development, poor tourism planning which leads to bad and/or uncontrolled tourism development and management can often have as many negative outcomes as positive ones. This course also emphasizes on understanding of sustainable development and the guiding values for promoting sustainable tourism.

References

BY30503 TOURISM PLANNING AND DEVELOPMENT

The course provides students with an understanding of the theory, practice, process and current issues of tourism planning. This course also introduces concepts of local, national and regional tourism planning and looks at the basic approaches, techniques and principles applied at this level. The concept of sustainability and sustainable development are introduced and provide the underpinning philosophy in this course. The focus in this subject lies on encouraging students to critically reflect on the nature of tourism planning, the context in which it takes place and its sustainability.

References
BY30603 TOURIST BEHAVIOUR

Tourist behaviour is of importance to tourists; public sector managers (for managing impacts and creating conditions for positive experiences between hosts and guests); tourism businesses (to understand customer needs and desires); and to tourism analysts and researchers (Pearce 2005). This course aims to introduce a range of ideas, concepts, and studies on travel motivation which provide an insightful understanding of tourists as consumers. Such knowledge is invaluable to the success of tourism business operations which falls within the area of the psychology of tourists’ behaviour. Therefore, this course examines what motivates tourists, how they make decisions, what tourists think of the products they buy, how much they enjoy and learn during their holiday experiences, how they interact with the local people and environment, and how satisfied they are with their holidays (Pearce 2005). This course also reviews different ways to classify tourists or tourist typologies, and examines a range of market niches within the tourism industry.

References

BY33203 SUSTAINABLE DESTINATION MANAGEMENT

This course demonstrates that tourism can be managed through the processes of policy formulation and planning as well as the need for an integrated approach to the planning, development and marketing of a destination. The concept of destination is examined at the national, state, regional and local levels and issues such as destination branding, events and destinations, managing destinations in crisis, and the impacts of tourists on destinations are explored. Students also will focus on the comparative advantage and competitive positioning of tourist destinations characterized by commitment to sustainable development principles and practices.

References

BY33603 TOURIST ATTRACTION MANAGEMENT

The purpose of this course is to determine the nature and purpose of visitor attractions, to investigate the main considerations in developing the visitor attraction product and the facilities required, to review major issues in the management and marketing of visitor attractions using a variety of real-world case studies, and to examine the challenges that will need to be addressed by the visitor attractions sector if it is to have a future in the ever-changing tourism world. The course is of interest to students seeking to develop knowledge and skills relevant to the pursuit of careers in the tourist attraction area, or in tourism industry sectors which interact closely with tourist attractions.

References
This course provides students with an insight into the tourism industry and the transformation taking place in information and communication technologies. Technology plays a vital enabling role in tourism and is crucial to the expansion of the industry. To enable students to work as a professional in a competitive market, personal communication skills must be in line with the demands of the real world of tourism management. In general, the course illustrates how tourism organisations can take advantage of the new tools in order to face the challenges, capture the opportunities and avoid the threats emerging as a result of the information communication technologies revolution.

References

Upon completion of this course, students will be able to discuss the range of special interest markets which exist within the tourism spectrum. This course examines both the theoretical and practical aspects of special interest tourists and their motivations. This understanding is then linked to the need to manage these specific needs by ensuring the qualities and characteristics of the destination are aligned to the needs of targeted niche markets. Student will be exposed to a range of niche markets, both those that are popular such as adventure and marine tourism, as well as newly emerging markets such as thanatourism, health and wellness tourism, and also volunteer tourism. Students will also be exposed to the potential entrepreneurial and employment opportunities that exist within special interest tourism for the purpose of encouraging business development and employment opportunities.

References

This course aims to expose students with the ‘hands-on’ tourism industry experience. Students will spend 3 months in an organisation of their choice i.e. accommodation, attraction, transportation, public and policy destination and intermediaries sector.
