How to solve the alopecia areata disease?

•Expected recovery within 6 months.

- Start by washing the infected area with water, then gently massage it for at least 3-5 minutes using brightening bar soap. Leave it in place until you take your next bath. At night, after taking a bath, apply bar soap to the infected area and then go to sleep.
- While taking a bath, use shampoo to gently massage your entire head and cleanse it for at least 1-2 minutes, then rinse it off.
- When going outside, apply a sufficient amount of facial cleanser to the infected area and use it as if it were a cream.

How to solve the dandruff, scalp, hair fall & breakage?

- During take bath using shampoo, gentle massage whole head and clean it at least 1-2 mints, then wash away
